

Build an NFT Marketplace

03. 04. 2022.

CryptoKet

Overview

We're looking for a developer to help us develop an elegant NFT Marketplace.

We will provide the [design](#) to you. It would be best if you cooperated with our designer through Figma. Kindly go through the project details below.

We need:

1. Responsive website that fully matches the design provided
2. Functionalities:
 1. Creator listings
 2. The list of latest NFTs with pricing filters
 3. Create, display and show NFT details
 4. Proper blockchain transactions and error handling
 5. All transaction should be accomplished through a single smart contract
3. Dark/Light theme toggle
4. Clean and scalable code
5. App deployment

We leave it up to you to decide the best frameworks and technologies.

You should be able to justify the pros and cons of the technologies that you choose.

If you're capable of developing the website that matches all of the project details, please send us a proposal.

We are open to your ideas on how you'd like to proceed with this.

Note

Although we know it's hard to estimate the time that it would take to create a project of this scale, we'd like you to put forth some rough deadlines and milestones.

We will compensate you well and on time.

Looking forward to working with you.
